Lab 4
Domain Name Server
Domain Name

Examples:
- Google.com
- Courses.cs.ut.ee
- Ut.ee

Mapping between a name and an IP address.
Domain Name Server (DNS)

• Provides Domain Name resolution to devices.

• Any device can be a Domain Name Server.

• It’s up to the client which one to listen to.
DNS structure

- Tree shaped.
- Recursive.
- Trust based.
Today

• Backup
• Setting up our inter-machine domain
• Setting up and configuring a recursive DNS
