LTAT.06.010 Pervasive Data Science
Lecture 2

Huber Flores, PhD
ASSOCIATE PROFESSOR

Tartu, Estonia 13/09/2021
Recap

- Pervasive Data Science
  - Overview of the course was provided
- Projects to develop in the seminar were presented
Goal: **To select a topic and develop it through all the course**

- Each student selected a project (via e-mail)
- Initial literature was also provided
- Slack forum is created to discuss ideas

**Result:** A 5 min presentation should be prepared for next lecture.
The presentation should include:

1. Summary of literature provided
2. Self understanding of the project
3. Initial ideas about how to explore the project
Next lecture

Presentation of each project
