

LTAT.06.010 Pervasive Data Science

Lecture 3

Huber Flores, PhD

ASSOCIATE PROFESSOR

Tartu, Estonia 21/02/2022

Recap

- Projects were selected
- Different methods were explained to understand how to execute each project

Overview

Goal: To explain individual understanding about selected projects

- 5 min presentation, followed by questions
- Initial (possible) solutions
- What is to be developed/designed?
 - A testbed
 - A user study
 - An analysis

Result: Directions will be provided along with additional material, e.g., datasets

Next lecture

Data analysis
