STATION for iOS and Android

What
Mobile app to find a parking place or to propose a parking place

Why
In cities and outside cities, non-polluting vehicles are moving more and more. Our means of transport evolve, starting with new bikes and electric scooters. Users are looking for safety and parking comfort. At the same time, individuals or companies offer more or less modernized spaces.

Outcome
A mobile application that geographically visualizes available parking locations and their categories. The category shows schematically the type of parking. It will be determined with the specific team.

Conditions
Any outcomes produced by the student team under and within the framework of the Software Project and any transferable intellectual property rights related thereto, incl. all the economic rights of the author and rights to protect intellectual property are transferred to Laurent Duhamel from the moment of creating them.

Benefits
If application is good enough
Longer term collaboration is possible if the team is interested.

When picking this project, please indicate if you would like to develop it for Android or iOS.
