Exercise 5

Tasks

Use the solutions to the previous exercises and:

1. Prepare the requirements specification to the problem you analyse. Specification template is given in the course Website.
2. Following the criteria for “good requirements”, carefully review all the requirements in your requirements specification.
3. Use the quality assessment form (given in the course Website) – assess and improve the quality of the overall requirements specification.

Submit – the requirements specification.  

(Total 20 points)

Submit solutions to the tasks using the course submission function no later than 15th of November.

Solution will be evaluated using the quality assessment form
