Why is it important to understand who are stakeholders?

What are three main stakeholder interests?
What is the main question when goals are analysed?

What are two types of “goal modelling” approaches? What are their differences and similarities?
What are the key **concepts** of goal modelling?

What are the key **relationships** in goal modelling?
What does $i^*$ mean?

What is the heuristics of the $i^*$ modelling?

What is the goal of creating strategic dependency model?

What is the goal of creating strategic rationale model?

What is the difference between early and late requirements?
What does KAOS mean?

What is the heuristics of the KAOS modelling?

What types of models are created during KAOS modelling?
What are the key questions for *goal refinement*?

When the refinement should stop?
