Lecture 1 Summary

It was great to see you all at the first lecture of the SSD course. During the lecture we have discussed:
- major terms,
- domain model for security risk management,
- metrics, which potentially could be captured when managing risks, and
- security risk management process.

During the practicals we have experienced the use of the domain model.

Please submit your homework assignments no latter than Tuesday (14.February).

Next time we will start discussion about the security modelling. More specifically we will focus on the understanding of security goals and secure business activities. Looking forward to see you all again!
