Lecture 2 Summary

During lecture 2 we have started to analyse modelling and modelling languages for security. This week topic was Understanding security goals and business activities. So we have looked to two modelling languages:
-- Security Risk-aware Secure Tropos and
-- Security Risk-Oriented BPMN

The video of this week lecture is now available at the course Website. The video includes both - the feedback to exercise 1 solutions and the presentation of the this week's topic.

The homework assignment is due (as always) next Tuesday, on the 21.February.

Next week we will continue Security Modelling topic. The major emphasis will be placed on the designing secure system functions and behaviour.
