Two-point tracking & Corner pin tracking

Additional explanations for Single point tracking
Single point tracking

• Tracks only position
  • X and y
    • Objects are nearly in a fixed distances and horizontal or vertical movement
    • With little changes in pixel during playing frames
How perfectly motion tracking works in x and y positions
Two point tracking

• The process is the same as single point tracking
  • Two trackers at the same time
  • Scale and rotation
• It will be applicable with soft or moderate rates of camera shake
Corner Pin Tracking

• Objects with four points
  • Screen replacements
  • Image frames
  • Signs
  • Other simple surfaces.
Thanks!
