Exercise-Homework

**Build a prototype**

**Purpose:**
- Illustrate the major functionality of the system
- Check the feasibility and validity of the requirements

- Prototyping using OR
  - Pen, paper, post-its, markers, etc
  - Develop the mockups, show scenario what the specified system should do

  The prototype should support (a part of) the requirements specified in the requirements specification. Revise and complement the specification, if prototyping shows discrepancies
Exercise-Homework

Build a prototype

Purpose:
• Illustrate the major functionality of the system
• Check the feasibility and validity of the requirements

• Prototyping:
  ➢ Pen, paper, post-its, markers, etc
  ➢ Develop the mockups, show scenario what the specified system should do

  • Describe the prototype in a separate section in the requirements specification
    • Which requirements are addressed in the prototype?

The prototype should support (a part of) the requirements specified in the requirements specification. Revise and complement the specification, if prototyping shows discrepancies.
