Have a friend abroad?
We will find places where you can travel together
for the lowest price.

Visit
tripmatch.ga

Type your and
your friend's city

Choose
departure date

Get list of best
plane tickets deals

HOW OUR ALGORITHM WORKS

- 1 Getting list of cities where you can travel from your city
- 2 Getting list of cities where your friend can travel from his city
- 3 Matching these two results and making list of cities where you both can travel
- 4 According to the date getting plane tickets prices
- 5 Sorting matched cities by tickets prices (from lower to higher)
- 6 Showing the result as a list of cities where you both can travel for the lowest price

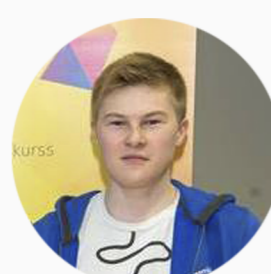

Targeted segment

People who have met each in the past and then moved to two different countries: past erasmus students, participants of different conferences and also people who moved from their country of birth.

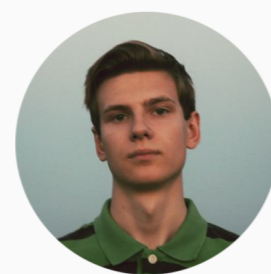

Business model

Standard partnership with Skyscanner that allows us to earn money for leads to their website. In future we want to integrate APIs that show hotel prices also to increase our value proposition.
