## Automated aerial video monitoring for everyone

### Idea

The solution makes automated aerial video monitoring affordable for everyone. It is not only cheap but also very simple to use. Just point on the map where you want your drone to fly and our web application, with the help of mobile application, makes sure the drone operates on the route and charges automatically.

### Solution

- Web application • • Interface for operating drones remotely
- Mobile application • • Securely execute orders that arrive via SMS
- Charging station • • Landing platform enables automatic charging
- Drone • • Modified Parrot AR 2.0 drone with auto charging capability
